# LIGHTING tomorrow

2005

# Results to Date and Update on New Competition

Kelly Gordon, PNNL April 6, 2005

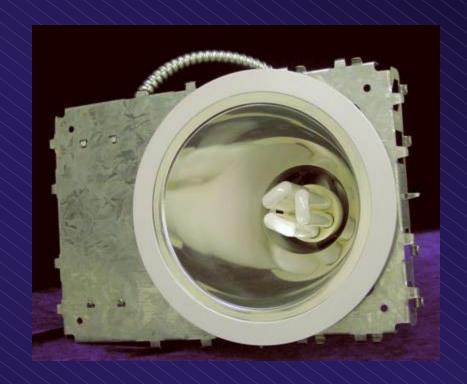

# Recessed Downlights

- RFPs in 2002 and 2004
- Product testing in IC environment
- Heat Management Workshop, Nov 2004
- Heat management concepts
- On-going technical assistance
- Short-term testing to validate ballast case operating temperature

#### Reflector CFLs

- 1<sup>st</sup> RFP 8 models qualified for elevated temperature life testing
- 2 products passed minimum 6000 hours
  - Philips EL/A BR30 16w
    and SLS/R40 20w
- Second draft RFP available for review

#### What is Lighting for Tomorrow?

- Partnership:
  - Industry (ALA)
  - Government (DOE)
  - Energy efficiency community (CEE)
- Lighting fixture design competition
- Forum for addressing market barriers
- Started in 2002

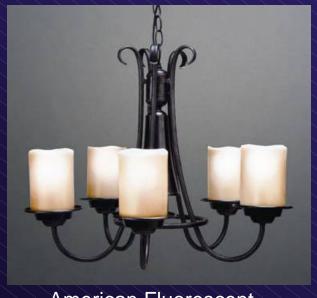

#### 1<sup>st</sup> Competition was Successful

- 2003-2004
- Rewarded attractive, innovative, marketable designs
- Focused attention on energy-efficient lighting fixtures

**Grand Prize Winner** 

American Fluorescent

Lightolier

Soren Momsen

**Forecast** 

#### Rules

#### 2003-04 Competition

- Open to fixture manufacturers, designers, students
- ENERGY STAR efficacy requirement
- All pin-based fixtures
- 2 phases: designs, then prototypes
- Seven fixture types
  - Chandelier, pendant, portable, sconce, surfacemount, task, track

#### Judges

- Lighting showrooms
- Homebuilders
- Interior designers
- Lighting designers
- Lighting energy efficiency experts
- Consumer magazines

#### **Selection Criteria**

- Potential Market Impact
  - Attractiveness
  - Value
  - Marketability
- Innovation in use of components and materials
- Functionality providing high quality illumination for the intended application

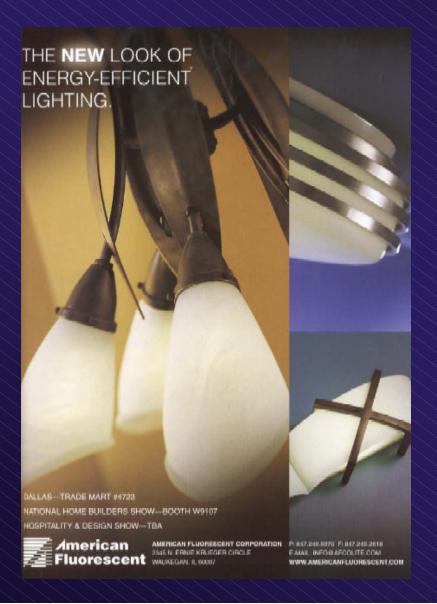

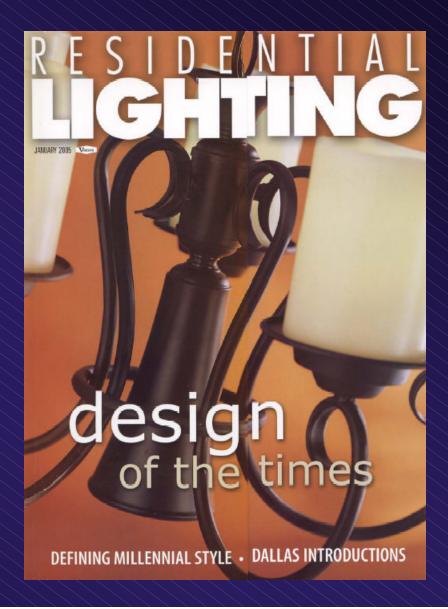

# Industry Response 2003-04 Competition

- 272 expressions of interest
- 156 paper designs received
- 24 finalists selected
- 18 prototypes received
- 4 winners selected

### Changes in 2005:

- Indoor fixture families (3 or more)
- Outdoor fixture families (2 or more)
- Technology innovation category
- Shorter timeline
  - One phase instead of two -- complete in 2005
- Must be capable of meeting ENERGY STAR v4.0
  - Winners must agree to earn ES within 1 year

#### 2005 Timeline

January 15 Announce competition

March 15 Intent forms due

May 15 Designs/prototypes due

June 6-7 Judging

July Winners notified

• Sept 17-20 Winners announced at

**ALA conference in Miami** 

## 2005 Sponsorship

American Lighting Association

- Consortium for Energy Efficiency
  - 25 utilities and regional energy efficiency programs

- U.S. Department of Energy
  - Represented by PNNL

## **Award Categories**

- Indoor Fixture Families
  - Grand Prize \$15,000
  - Runner-Up \$7,500
- Outdoor Fixture Families
  - Grand Prize \$15,000
  - Runner-Up \$7,500
- Technology Innovation
  - One award of \$15,000

#### Other LFT Activities

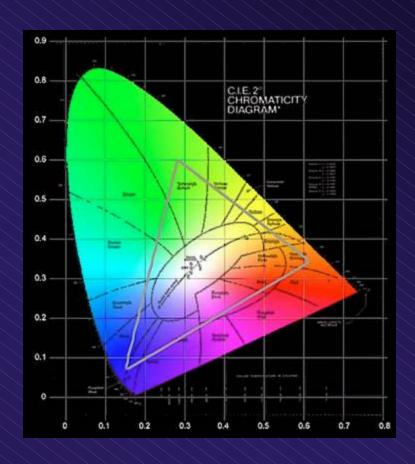

#### CEE Fixture/Fan Group

- Residential fixture program template for efficiency programs
- Develop educational resources to support highefficiency fixtures
- Propose color naming system

#### Other LFT Activities

#### Color issues

- On-going market
  barrier for fluorescent
  sources
- How to communicate color characteristics to consumers?

#### Other LFT Activities

- Promotion and education
  - Press releases
  - Local events showcasing winners
  - Presentations to industry groups
  - Exhibit winning fixtures
  - Change-a-Light tie-in

#### **Future Directions**

- More LEDs, assuming:
  - White LED efficacy minimum 50 lpw
  - Life rating system adopted by industry
  - Acceptable white color
- CFL-LED hybrids
- Architecturally-integrated
- Technical innovation

Lumileds
